

Actions Cheat Sheet

GitHub Actions give you the flexibility to build automated software development lifecycle workflows. You can write individual tasks, called actions, and combine them to create custom workflows in your repository. GitHub Actions are automated processes allowing you to build, test, package, release, or deploy any code project on GitHub, but you can also use them to automate any step of your workflow: merging pull requests, assigning labels, triaging issues to name a few.

Workflow Syntax1

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax2

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax1

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax2

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax3

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax4

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax1

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax2

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax1

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax2

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax3

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.

Workflow Syntax4

Workflow files use YAML syntax, and must have either a `.yaml` or `.yml` file extension. You must store workflow files in the `.github/workflows/` directory of your repository.
